## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claim 1-10, drawn to "add-on base station for the purpose of coverage expansion", classified in class 455, subclass 561.
- II. Claim 11-17, drawn to "cellular network with call forwarding and message routing", classified in class 455, subclass 445.
- III. Claim 18-19, drawn to "method to establish a link between a caller and an addressee", classified in class 380, subclass 247.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as combination and subcombinations.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claimed call forwarding and message routing does not particularly require to be part of the add-on base station for coverage expansion in the claims of group I, any other cellular network element (such as a switching point) may provide the claimed function. Further, the combination as claimed does not require the particulars of the subcombination as claimed because the claimed

Art Unit: 2642

method to establish a link between a caller and an addressee does not particularly require to be part of the add-on base station for coverage expansion in the claims of group I; means for encryption/decryption may reside within the mobile phone unit, the method may also be used for communication between computers in a LAN. The subcombinations have separate utility such as providing for call forwarding and routing of messages within a cellular network and a method for encryption/decryption of messages between two parties.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II and Group III, restriction for examination purposes as indicated is proper.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
